

What's New with

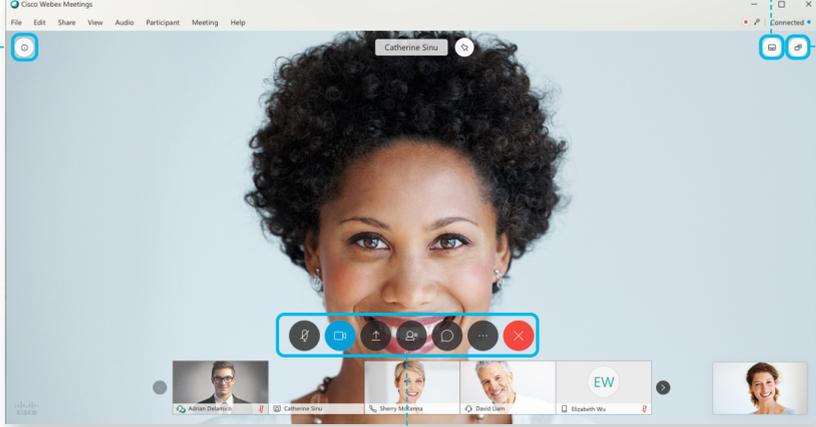

Cisco Webex Meetings

Video-Centric Experience for Meetings and Events

We've expanded the space used for video meetings, added new layouts, and simplified your meeting controls.

Change your **Video Layout** to control where you view video participants and panels on your screen.

Choose **Floating Panel View** to position any panel where you want it - even on a second monitor.

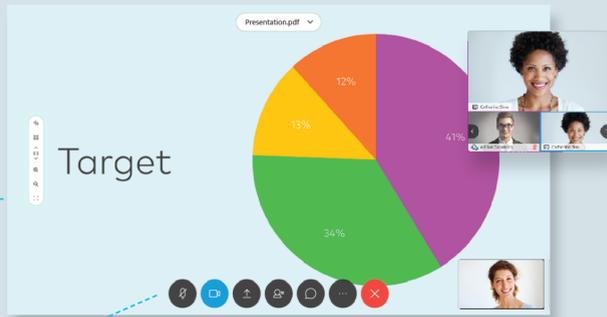

Meeting controls hide when you're not using them and then re-appear when you move your cursor.

Access the **Meeting Info** to get details about the meeting.

Centralized Meeting and Event Controls

Get easy access to all essential meeting controls in one place.

- Annotations
- Thumbnail View
- Page Controls
- Zoom Controls
- Fit to Viewer

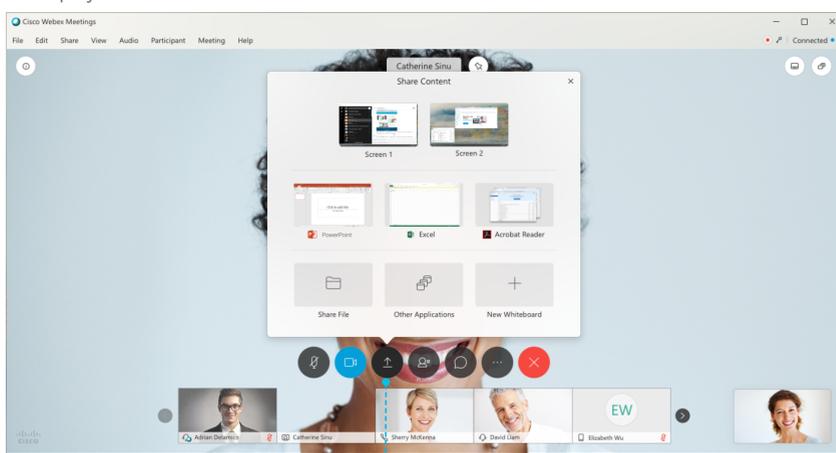

- Mute
- Share
- Record
- Start Video
- Participants
- Chat
- Leave
- More Options

- | Meetings | Events |
|-----------------------------|-------------------|
| Notes | Q&A |
| Lock Meeting | Polling |
| Start Streaming to Facebook | Multimedia Viewer |
| Invite and Remind | Lock Event |
| Copy Meeting Link | Invite and Remind |
| Audio Connection | Copy Event Link |

Sharing

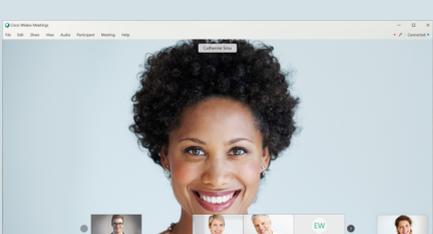

The new sharing options show you thumbnails to help you find the content you want to share more quickly.

Choose **Share Content** to share one of your available screens or applications.

Video Only Layouts

New layouts let you control how you view your meeting.

Active Speaker and Thumbnail View
Focus on who's talking, but still see up to 5 other participants.

click to switch layouts

Grid View
View up to 25 videos simultaneously.

- Active Speaker Video View
- Grid View
- Active Speaker and Thumbnail View

Video + Sharing Layouts

New sharing layouts let you choose how to view content.

Active Speaker and Thumbnail View
When someone starts sharing, the focus shifts to the shared content.

Floating View
Move or resize panels to better see what's being shared.

Side-by-Side View

Keep all video views together next to the shared content.

Try out the new meeting experience.
